

NEW!

# Composer™

OPTICAL DISC DUPLICATOR

**PRIMERA**  
TECHNOLOGY, INC.

# Features, P And A Price That'll B

*Producing your own CD-Rs has never been faster and easier than with the new Composer Optical Disc Duplicator. It lets you duplicate up to 50 CD-Rs per job in your own office or production facility at speeds of up to 12x, the fastest currently available.*

*Composer's advanced robotics and software work automatically, so no operator intervention is required after a job is started. Highly intuitive authoring and duplication software from Prassi can be learned in an hour or less. Depending upon your needs, you can also print directly onto your discs with either of Primera's popular ink-jet or thermal disc printers.*

*Whether you need to duplicate music, video, software or data, Composer makes the process simple — at a price virtually any company can afford!*

# Performance The Music To Your Ears

## Easy To Operate, Proven Reliability

An efficient and user-friendly design streamlines all operations. The uncomplicated control panel has just three buttons.

Since most duplication jobs are unattended, reliability has carefully been designed into Composer. Its "pick-and-

place" mechanism greatly improves upon the reliability of other designs, assuring you nonstop, high-volume production. In addition, Composer has a high-impact plastic front and all-metal case. Its rugged construction and styling make it equally at home in office or production environments.

## Need To Record and Print DVD-Rs?

No problem! A Composer DVD-R model is also available. If you're not using DVD-R yet, you can start using your Composer now with CD-R. Then, upgrade later to DVD-R as your needs change.

## Uncompromised Value

Primera Technology's high-volume approach to design and manufacturing assures you of the highest quality at the lowest possible cost. Compared to other similar duplication systems, Composer is simply the best value available today!

## Professional Software Included

Composer comes with either PrimoCD Pro or PrimoDVD mastering and duplication software from Prassi, a well-known and highly respected CD-R software company.

## Two Printing Options

Composer comes ready for the integration of a Primera Technology CD printer. You can print text, graphics, logos and even full-color photos directly onto the top surface of discs.

Both ink-jet and thermal printers are available, so you can choose which one works best for you. Select the Signature III® CD Color Printer for 1200 x 1200 dpi, full-color printing onto printable-surface discs. Or choose the Inscripta™ Thermal CD Printer for durable, scratch- and smudge-resistant, completely waterproof printing onto standard discs.

*Duplicate and Print Your  
CD-Rs or DVD-Rs  
with Composer — The New  
Price/Performance Leader!*

It's an accepted fact that producing your own CD-Rs or DVD-Rs in-house saves time, money and gives you lots of flexibility. However, robotic-based production systems capable of recording and printing quantities of discs have traditionally been complicated and expensive.

Primera Technology's new Composer Optical Disc Duplicator changes all of that. Whether you produce 50 discs a week or thousands, Composer does the job for far less money than comparable disc duplication systems. You'll be able to easily and inexpensively create your own unique, on-demand CD-Rs or DVD-Rs in just a few minutes each!

Optional color or monochrome printing takes less than a minute per disc using either ink-jet or thermal printers. Finished discs look as professional as those produced by outside service bureaus.

Composer is the perfect solution for professional, in-house production of CD-Rs and DVD-Rs. It's the new price/performance leader in optical disc duplication!

## Technical Specifications

<b>Model:</b>	Composer Optical Disc Duplicator
<b>Configurations:</b>	
<b>CD-R System</b>	One 48x CD-R recorder, Prassi PrimoCD Pro Software, Robotic Transport Station
<b>DVD-R System</b>	One DVD-R recorder, Prassi PrimoDVD Software, Robotic Transport Station
<b>Print-Only System</b>	(Conductor™ Printer Autoloader): Robotic Transport Station only; controlled by Primera Technology ink-jet or thermal disc printer
<b>Optional Printers:</b>	Inscripta Thermal CD Printer or Signature III CD Color Printer by Primera Technology
<b>Minimum System Requirements:</b>	Pentium® II/III or Celeron® Processor (or equivalent) at 300 MHz or higher, 32MB RAM, available PCI slot, bus mastering SCSI host adapter (Advansys ASB3940UA or compatible), one free serial port, one free parallel printer port
<b>Disc Capacity:</b>	50 disc input, 50 disc output
<b>Recordable Formats:</b>	CD: CD-R, CD-RW, CD-Audio (CD-DA), Video-CD, MP3 to CD-Audio, most other industry-standard CD formats DVD: DVD-R, DVD-RW; other formats to be added as they become standardized by the industry
<b>Operating Systems:</b>	Windows 95/98/NT and Windows 2000
<b>Interface:</b>	
<b>Control</b>	Serial port
<b>Printing</b>	Parallel port
<b>Image Data</b>	SCSI
<b>Power Requirement:</b>	100-240 VAC, 50/60 Hz, 60 watts
<b>Weight</b>	12.5 lbs. (5.67 kg)
<b>Dimensions</b>	16.625"W x 10"H x 10.125"D (422mW x 254mmH x 257mmD)
<b>Certifications:</b>	
<b>Emissions</b>	FCC Class B, CE
<b>Safety</b>	TUV-GS, cTUVus, CE
<b>Warranty:</b>	One year return-to-depot

A print-only version called Conductor™ is also available (Printer sold separately).

Optional Signature III CD Color Printer

Optional Inscripta Thermal CD Printer

Composer is from Primera Technology, an industry-leading manufacturer of optical disc printing equipment. Its management is responsible for the design and manufacture of over one million thermal transfer, dot matrix and ink-jet printers, including the popular Signature III CD Color Printer. Primera Technology products are distributed worldwide in over 80 countries.
