

PTBurn™ Network Software for the PRIMERA Disc Publisher

Now you can burn and print CDs and DVDs over your network!

PTBurn Network Software is a new, low-cost software package for Primera's Disc Publisher that adds network capability for your disc burning and printing jobs.

Up to five users may send CD or DVD recording and print jobs to Disc Publisher remotely from client PCs. Additional five-user license blocks are available for connecting as many client PCs as desired. The software runs on virtually any server/client network under Windows® 2000 or XP Professional.

It's the ideal solution whether you are publishing "one-off" unique content discs or duplicating quantities of discs from a master disc or files stored on a PC's hard drive.

Remote User Features

PTBurn Network includes a host of useful features such as job status, priority job queue management, type of disc (CD/DVD), multiple copies and replacement fields from a comma-delimited data file. Easy to use disc labeling software called SureThing™ CD Labeler is built-in so that you can quickly design professional-looking disc faces that Disc Publisher prints directly onto printable-surface CDs or DVDs.

Job status is reported back to the user in real time. This makes remote recording and printing highly efficient and reliable since Disc Publisher's major functions can be viewed remotely instead of having to physically supervise the unit in operation.

Reliable Network Duplication at a Realistic Price

Like an office network laser printer, Disc Publisher has been carefully designed for unattended, remote network operation. Yet it costs thousands less than other network disc publishers without sacrificing features. Here is what's included:

- 52x CD or 4x/16x DVD/CD recorder
- Exclusive "all-in-one" design
- 25-disc capacity
- Optional 50-disc Kiosk Mode Kit
- Built-in 2400 dpi full-color printing
- Optional 80mm mini-disc and CD business card adapters
- Small, compact size fits almost anywhere

Everyone On Your Network Can Copy and Print CDs and DVDs!

For network CD and DVD publishing and duplication, the combination of PTBurn and Disc Publisher simply can't be beat! PTBurn and Disc Publisher are from Primera Technology, the world's leading manufacturer of automated CD/DVD duplication and printing equipment.
