

Signature IV[®]
CD COLOR PRINTER

PROFESSIONAL-QUALITY

**PRINTING
FASTER THROUGHPUT!**

The Signature IV is the newest ink-jet CD/DVD color printer from industry leader Primera Technology. With incredible 1200 x 1200 dpi resolution and throughput speed significantly faster than its predecessor, Signature IV is your best solution for virtually any optical disc printing job. Signature IV lets you create bright, vibrant full-color discs that reflect the professional image of your business!

SIGNATURE IV

Signature IV[®]

CD COLOR PRINTER

If you utilize CD-Rs or DVD-Rs for recording and storing data, software, video, music and audio or images, don't take chances with your disc labeling. Felt-tip markers can convey an unprofessional image and potentially ruin your discs. Paper stick-on labels are difficult and time-consuming to apply and can peel off inside of players or drives. But with the new Signature IV CD Color Printer, you can print colorful, customized CD/DVD designs directly onto printable-surface optical disc media at a very affordable price.

Markers and paper stick-on labels can look unprofessional and even damage your CD-R media and CD-ROM drive.

Signature IV produces stunning, full-color CD-Rs with high-resolution text and bright, bold images, graphics and photos.

EXCEPTIONAL PRINT QUALITY, FASTER THROUGHPUT

Signature IV utilizes advanced ink-jet technology that produces 1200 x 1200 dpi – an amazing 1.44 million pixels per square inch. You can print full-color text, graphics, logos, photos and more with stunning clarity and detail in up to 16.7 million different colors. No matter what you print, the results will impress you and your customers.

Signature IV is fast too. A typical full-color disc with 100% coverage prints in just 27 seconds. The printer's tray in/out speed has also been increased by 67% compared to the previous model. So, you'll be able to produce more discs per hour than ever before!

ADVANCED INKS AND SOFTWARE

Signature IV utilizes a special ink formulation combined with our exclusive built-in PrimaColor™ color matching software to deliver bright, bold and true photo-realistic colors onto printable-surface optical media. On most media, drying time is almost immediate. A new built-in early-warning system notifies the user as ink levels get close to empty. Ink capacity is over twice that of other similar cartridges, offering longer print runs between cartridge changes and a lower cost per printed disc.

You can use printable-surface CD-Rs and DVD-Rs from virtually all major media manufacturers, including those from our Authorized Media Partners listed below. Or, use our Signature-branded Tuff-Coat™ media – a unique coating which makes printed discs highly water- and smear-resistant.
